

**Ham's F-10 Nutrient Mixture
with L-Glutamine and HEPES
(F10)**

Catalog #09311

Product Description

Ham's F-10 Nutrient Mixture with L-Glutamine and HEPES (F10) is well suited for supporting the growth of a broad range of mammalian cell lines. F10 was originally developed to support the clonal growth of Chinese Hamster Ovary (CHO) cells, as well as HeLa and mouse L-cells. F10 has been shown to support the growth of human diploid cells, white blood cells (WBC) for chromosomal analysis, and primary explants of rat, rabbit and chicken tissue. Ham's F-10 Nutrient Mixture with L-Glutamine and 25 mM HEPES provides more effective buffering condition in the optimum pH range of 7.2-7.4.

Product Use

F10 is for research use only. It is not approved for human or animal use, or for application in *in vitro* diagnostic procedures.

Storage

Store the medium at 4°C. Protect from light.

Shipping

Room temperature.

Caution: If handled improperly, some components of the medium may present a health hazard. Take appropriate precautions when handling it, including the wearing of protective clothing and eyewear. Dispose of properly.
