Adipocyte Medium (AdM)
Catalog #7201

Product Description
Adipocyte Medium (AdM), when used with Adipocyte Growth Supplement (AdGS, Cat #7262) and 12.5 ml of fetal bovine serum (FBS) is a complete medium designed for optimal growth of normal adipocytes in vitro. It is a sterile, liquid medium which contains essential and non-essential amino acids, vitamins, organic and inorganic compounds, hormones, growth factors, trace minerals and a low concentration of fetal bovine serum (2.5%). The medium is HEPES and bicarbonate buffered and has a pH of 7.4 when equilibrated in an incubator with an atmosphere of 5% CO₂/95% air. The medium is formulated (quantitatively and qualitatively) to provide an optimally balanced nutritional environment that selectively supports the growth of normal adipocytes in vitro.

Components
AdM consists of 500 ml of basal medium, 12.5 ml of FBS (Cat. #0012), 5 ml of Adipocyte Growth Supplement (AdGS, Cat. #7262) and 5 ml of penicillin/streptomycin solution (P/S, Cat. #0503). Note: FBS, AdGS and P/S are not pre-mixed in AdM; they must be added separately to make the complete AdM.

Product Use
AdM is for research use only. It is not approved for human or animal use, or for application in in vitro diagnostic procedures.

Storage
Store the basal medium at 4°C and the AdGS, FBS and P/S solution at -20°C. Protect from light.

Shipping

Instructions for Use
Thaw AdGS, FBS and P/S solution at 37°C. Gently tilt the tubes several times to ensure the contents are completely mixed before adding to the medium. Spray the medium bottle and tubes with 70% ethanol, and wipe to remove excess liquid. In a sterile field, remove the caps without touching the interior threads with fingers. Add AdGS, FBS and P/S solution to the medium and mix well. Since several components are light-labile, the medium should not be exposed to light for extended periods. We do not recommend warming medium in a 37°C water bath prior to use. When stored in the dark at 4°C, the reconstituted medium is stable for one month.

Caution: If handled improperly, some components of the medium may present a health hazard. Take appropriate precautions when handling it, including the wearing of protective clothing and eyewear. Dispose of properly.
